Without Conscience-Robert D. Hare 2011-09-20 Most people are both repelled and intrigued by the images of cold-blooded, conscienceless murderers that increasingly populate our movies, television programs, and newspaper headlines. With their flagrant criminal violation of society's rules, serial killers like Ted Bundy and John Wayne Gacy are among the most dramatic examples of the psychopath. Individuals with this personality disorder are fully aware of the consequences of their actions and know the difference between right and wrong, yet they are terrifyingly self-centered, remorseless, and unable to care about the feelings of others. Perhaps most frightening, they often seem completely normal to

unsuspecting targets--and they do not always ply their trade by killing. Presenting a compelling portrait of these dangerous men and women based on 25 years of distinguished scientific research, Dr. Robert D. Hare vividly describes a world of con artists, hustlers, rapists, and other predators who charm, lie, and manipulate their way through life. Are psychopaths mad, or simply bad? How can they be recognized? And how can we protect ourselves? This book provides solid information and surprising insights for anyone seeking to understand this devastating condition.

Casebook in Abnormal Psychology-Timothy A. Brown 2001 Using cases taken from the authors' case files or from case files of other working clinicians, this casebook portrays the rich and arresting nature of disorders as they are displayed in real people. Cases illustrate every major

DSM-IV category and are followed by a therapy outcome section which gives the "rest of the story" of what happened to these clients. The authors draw on an extremely current and thorough database, look at the multiple causes of disorders, and incorporate developmental and cultural issues in each case. Two complex cases are included without a diagnosis to give students an opportunity to come up with diagnoses on their own.
