Ocean Beach-Wendy Wax 2012-06-26 Three women find a second chance—or is it a third—in this novel from the USA Today bestselling author of Best Beach Ever. When unlikely friends Madeline, Avery, and Nicole arrive in Miami's South Beach neighborhood, they're hoping for a do-over. Literally. They've been hired to bring a historic house back to its former glory on a new television show called Do Over. If they can just get this show off the ground, Nikki could fix her finances, Avery could restart her career, and Maddie would have a shot at keeping her family together. The women quickly realize that having their work broadcast is one thing, but having their personal lives play out on TV is another. Soon they're struggling to hold themselves, and the project, together. With a decades-old mystery—and hurricane season—looming, the women are forced to figure out just how they'll weather life's storms...

Writing Mathematically-Candia Morgan 2002-01-04 School mathematics curricula internationally tend to emphasise problem-solving and have led to the development of opportunities for children to do maths in a more open, creative way. This has led to increased interest in 'performance-based' assessment, which involves children in substantial production of written language to serve as 'evidence' of their mathematical activity and achievement. However, this raises two important questions. Firstly, does this writing accurately present children's mathematical activity and ability? Secondly, do maths teachers have sufficient linguistic awareness to support their students in developing skills and knowledge necessary for writing effectively in their subject area? The author of this book takes a critical perspective on these questions and, through an investigation of teachers' readings and evaluations of coursework texts, identifies the crucial issues affecting the accurate assessment of school mathematics.

Financial Accounting-Paul D. Kimmel 2004-03 Now in its Third Edition, Financial Accounting by Kimmel, Weygandt, and Kieso has been tested and approved in the classroom. This best-selling text has helped students hit the road with a practical set of tools, and the confidence they need to use those tools effectively in making business decisions. Financial Accounting provides students with an understanding of those concepts that are fundamental to the use of accounting. Starting with a "macro" view of accounting information, the authors present real financial statements and establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. They motivate students by grounding the discussion in the real world, showing them the relevance of the topics covered to their future career. The authors identify a finite set of tools necessary to make business decisions based on financial information: The Decision Toolkit. This toolkit is consistently re-introduced throughout the text, logically sequenced to take full advantage of the tools presented in earlier chapters, and summarized in the final chapter. This thorough integration of the use of financial statements for decision-making makes this one of the most user-oriented texts available today.
