Forcing the Spring-Jo Becker 2015 ?An engaging narrative... a thorough, perceptive read... the book stands testament to good political writing and a wealth of information made alive through prose.” --Publishers Weekly (STARRED) A tour de force of groundbreaking reportage by Pulitzer Prize-winning journalist Jo Becker, Forcing the Spring is the definitive account of five remarkable years in American civil rights history: when the United States experienced a tectonic shift on the issue of marriage equality. Beginning with the historical legal challenge of California's ban on same-sex marriage, Becker expands the scope to encompass all aspects of this momentous struggle, offering a gripping behind-the-scenes narrative told with the lightning pace of the greatest legal thrillers. For nearly five years, Becker was given free rein in the legal and political war rooms where the strategy of marriage equality was plotted. She takes us inside the remarkable campaign that rebranded a movement; into the Oval Office where the president and his advisors debated how to respond to a fast-changing political landscape; into the chambers of the federal judges who decided that today's bans on same-sex marriage were no more constitutional than the previous century's bans on interracial marriage; and into the mindsets of the Supreme Court judges who decided the California case and will likely soon decide the issue for the country at large. From the state-by state efforts to win marriage equality at the ballot box to the landmark Supreme Court case that struck down a law that banned legally married gay and lesbian couples from receiving federal benefits, Becker weaves together the political and legal forces that reshaped a nation. Forcing the Spring begins with California's controversial ballot initiative Proposition 8, which banned gay men and lesbians from marrying the person they loved. This electoral defeat galvanized an improbable alliance of opponents to the ban, with political operatives and Hollywood royalty enlisting attorneys Ted Olson and David Boies?the opposing counsels in the Supreme Court's Bush v. Gore case?to join together in a unique bipartisan challenge to the political status quo. Despite stiff initial opposition from the gay rights establishment, the case against Proposition 8 would ultimately force the issue of marriage equality all the way to the Supreme Court, transforming same-sex marriage from a partisan issue into a modern crisis of civil rights. Based on singular access to the internal workings of this momentous trial?and enlivened by original interviews with the participants on both sides of the case, many speaking for the first time?Forcing the Spring is at once an emotion-packed tale of love and determination as well as an eye-opening examination of an evidentiary record that federal courts across the nation are now relying on to strike down bans similar to California's. Shuttling between the twin American power centers of Hollywood and Washington?and based on access to all the key players in the Justice Department and the White House?Becker offers insider coverage on the true story of how President Obama ?evolved” to embrace marriage equality, his surprising role in the Supreme Court battle, and the unexpected way the controversial issue played in the 2012 elections. What starts out as a tale of an epic legal battle grows into the story of the evolution of a country, a testament and old-fashioned storytelling to move public opinion. Becker shows how the country reexamined its opinions on same-sex marriage, an issue that raced along with a snowballing velocity which astounded veteran political operatives, as public opinion on same-sex marriage flipped and elected officials repositioned themselves to adjust to a dramatically changed environment. Forcing the Spring is the ringside account of this unprecedented change, the fastest shift in public o

Contemporary Issues in Occupational Therapy-Jennifer Creek 2007-04-04 This book is a collection of essays on occupational therapy theory and its application in practice. They represent the reflections, on aspects of occupational therapy, of experts in their own fields who are at the cutting edge of theory development. At the

beginning of the twenty-first century, occupational therapists are beginning to conceptualise occupational therapy as a complex intervention. This book provides the level of detail to support such an understanding. Two chapters discuss the profession of occupational therapy: how it has developed and what is involved in being an occupational therapist. Other chapters explore the idea of occupation from different perspectives, providing detailed analyses of the concept that is central to the profession of occupational therapy. The third type of chapter describes how theory is used in occupational therapy practice, for example, in making decisions or implementing research findings.

Overrated-Eugene Cho 2014-09-01 "It can be fashionable to talk about the poor but not as fashionable to talk to the poor. It may be popular to talk about justice and still not know any victims of injustice. But we will never make poverty history until we make poverty personal. Eugene Cho shatters all our hipster coffee-shop talk of justice and dares you to dive into the trenches and do something real with your life." Shane Claiborne, author, activist, and friend of Eugene Cho "A gutsy and gritty exposé on the motives of a generation in love with the idea of saving the world, Overrated by Eugene Cho is a necessary exercise for all who desire to truly be a part of the change God wants to bring to humanity. This book is real, personal, necessary, and a must-read, so we can all continue on the path toward justice for all." Louie Giglio, Passion City Church/Passion Conferences "When you're done talking about the gospel and are ready for your walking to be the gospel: Start here. I needed this book." Ann Voskamp, author of the New York Times bestseller One Thousand Gifts Many people today talk about justice, but are they living justly? They want to change the world, but are they being changed themselves? Eugene Cho has a confession: "I like to talk about changing the world but I don't really like to do what it takes." If this is true of the man who founded the One Day's Wages global antipoverty movement, then what must it take to act on one's ideals? Cho does not doubt the sincerity of those who want to change the world. But he fears that today's wealth of resources and opportunities could be creating "the most overrated generation in history. We have access to so much but end up doing so little." He came to see that he, too, was overrated. As Christians, Cho writes, "our calling is not simply to change the world but to be changed ourselves." In Overrated, Cho shows that it is possible to move from talk to action.

Group Theory in Physics-Wu-Ki Tung 1985 An introductory text book for graduates and advanced undergraduates on group representation theory. It emphasizes group theory's role as the mathematical framework for describing symmetry properties of classical and quantum mechanical systems. Familiarity with basic group concepts and techniques is invaluable in the education of a modern-day physicist. This book emphasizes general features and methods which demonstrate the power of the group-theoretical approach in exposing the systematics of physical systems with associated symmetry. Particular attention is given to pedagogy. In developing the theory, clarity in presenting the main ideas and consequences is given the same priority as comprehensiveness and strict rigor. To preserve the integrity of the mathematics, enough technical information is included in the appendices to make the book almost self-contained. A set of problems and solutions has been published in a separate booklet.

Planning for Sustainability-Stephen M. Wheeler 2004-08-19 Existing patterns of urbanization are unsustainable in the long run. Current development practices consume enormous amounts of land and resources, damage local ecosystems, produce pollutants, create huge inequalities between groups of people and undermine local community and quality of life. Unfortunately planning has itself led to many unsustainable development practices. Planning for Sustainability presents a straightforward, systematic analysis of how more sustainable cities and towns can be brought about. It does so in a highly readable manner that considers in turn each scale of planning: international, national, regional, municipal, neighbourhood, site and building. In the process it illustrates how sustainability initiatives at these different scales interrelate and how an overall framework can be developed for more livable communities.
