The Global War on Christians-John L. Allen, Jr. 2016 "This book is about the most dramatic religion story of the early 21st century, yet one that most people in the West have little idea is even happening: The global war on Christians," writes John Allen. "We're not talking about a metaphorical 'war on religion' in Europe and the United States, fought on symbolic terrain such as whether it's okay to erect a nativity set on the courthouse steps, but a rising tide of legal oppression, social harassment and direct physical violence, with Christians as its leading victims. However counter-intuitive it may seem in light of popular stereotypes of Christianity as a powerful and sometimes oppressive social force, Christians today indisputably form the most persecuted religious body on the planet, and too often its new martyrs suffer in silence." This book looks to shatter that silence. From Iraq and Egypt to Sudan and Nigeria, from Indonesia to the Indian subcontinent, Christians in the early 21st century are the world's most persecuted religious group. According to the secular International Society for Human Rights, 80 percent of violations of religious freedom in the world today are directed against Christians. In effect, our era is witnessing the rise of a new generation of martyrs. Underlying the global war on Christians is the demographic reality that more than two-thirds of the world's 2.3 billion Christians now live outside the West, often as a beleaguered minority up against a hostile majority-- whether it's Islamic fundamentalism in the Middle East and parts of Africa and Asia, Hindu radicalism in India, or state-imposed atheism in China and North Korea. In Europe and North America, Christians face political and legal challenges to religious freedom. Allen exposes the deadly threats and offers investigative insight into what is and can be done to stop these atrocities.-back of book.

Doing Phenomenology-E. Spiegelberg 2012-12-06 Substantial encouragement for this volume came from the editors and readers of the Studies for Phenomenological and Existential Philosophy (SPEP) at Northwestern University Press. But its publi cation has been made possible only by the unqualified and un abridged acceptance of the Editorial Board of Phaenomen%gica, which at the time was still headed by its founder, the late Professor H.

L. Van Breda, who welcomed the manuscript most generously. This makes his untimely passing even more grievous to me. The stylistic copy editing and proof reading were handled ef ficiently by Ruth Nichols Jackson, secretary of the Philosophy Department. In the proof reading I also had the able help of my colleague Stanley Paulson. I dedicate this book to the memory of my late brother, Dr. chern. Erwin Spiegelberg, at the time of his death assistant professor at the University of Rio de Janeiro, who preceded me by two years in emigrating from Nazi Germany. When in 1938 he put an end to his life in an apparent depression, he also did so in order not to become a burden to his brothers, who were on the point of following him. Whatever I, more privileged in health and in opportunities in the country of my adoption, have been able to do and achieve since then has been done with a sense of a debt to him and of trying to live and work for him too.

Critique and Disclosure-Nikolas Kompridis 2011-08-19 In Critique and Disclosure, Nikolas Kompridis argues provocatively for a richer and more time-responsive critical theory. He calls for a shift in the normative and critical emphasis of critical theory from the narrow concern with rules and procedures of Jürgen Habermas's model to a change-enabling disclosure of possibility and the enlargement of meaning. Kompridis contrasts two visions of critical theory's role and purpose in the world: one that restricts itself to the normative clarification of the procedures by which moral and political questions should be settled and an alternative rendering that conceives of itself as a possibility-disclosing practice. At the center of this resituation of critical theory is a normatively reformulated interpretation of Martin Heidegger's idea of "disclosure" or "world disclosure." In this regard Kompridis reconnects critical theory to its normative and conceptual sources in the German philosophical tradition and sets it within a romantic tradition of philosophical critique. Drawing not only on his sustained critical engagement with the thought of Habermas and Heidegger but also on the work of other philosophers including Wittgenstein, Cavell, Gadamer, and Benjamin, Kompridis argues that critical theory must, in light of modernity's time-consciousness, understand itself as fully situated in its time--in an ever-shifting and open-ended horizon of possibilities, to which it must respond by disclosing alternative ways of thinking and acting. His innovative and original argument will serve to move the debate over the future of critical studies forward--beyond simple antinomies to a consideration of, as he puts it, "what critical theory should be if it is to have a future worthy of its past."

In Vitro Haploid Production in Higher Plants-S. Mohan Jain 1996-07-31 Since the beginning of agricultural production, there has been a continuous effort to grow more and better quality food to feed ever increasing populations. Both improved cultural practices and improved crop plants have allowed us to divert more human resources to non-agricultural activities while still increasing agricultural production. Malthusian population predictions continue to alarm agricultural researchers, especially plant breeders, to seek new technologies that will continue to allow us to produce more and better food by fewer people on less land. Both improvement of existing cultivars and development of new high-yielding cultivars are common goals for breeders of all crops. In vitro haploid production is among the new technologies that show great promise toward the goal of increasing crop yields by making similar germplasm available for many crops that was used to implement one of the greatest plant breeding success stories of this century, i. e. , the development of hybrid maize by crosses of inbred lines. One of the main applications of anther culture has been to produce diploid homozygous pure lines in a single generation, thus saving many generations of backcrossing to reach homozygosity by traditional means or in crops where self-pollination is not possible. Because doubled haploids are equivalent to inbred lines, their value has been appreciated by plant breeders for decades. The search for natural haploids and methods to induce them has been ongoing since the beginning of the 20th century.

Blending practical information with lively personal memoir, Cabin Lessons tells the wryly funny, heartwarming story of their eventful journey—from buying an unforgiving plot of land on an eroding cliff to finally enjoying the lakeside hideaway of their dreams. "Spike Carlsen's book . . . chronicles the family's route from a scenic dream (with a modest budget) to designing and building, to filling the space with family, to a (rejected) blank-check purchase offer from a slickster driving an Italian-made car. And it's all told in the voice of someone you want to see sitting on the other side of the campfire, sharing a blanket with his wife, dispensing charming tales and life lessons." —Duluth News Tribune (Minnesota)
