**Dereliction of Duty**-H. R. McMaster 1998-05-08 "The war in Vietnam was not lost in the field, nor was it lost on the front pages of the New York Times or the college campuses. It was lost in Washington, D.C." - H. R. McMaster (from the Conclusion) Dereliction Of Duty is a stunning new analysis of how and why the United States became involved in an all-out and disastrous war in Southeast Asia. Fully and convincingly researched, based on recently released transcripts and personal accounts of crucial meetings, confrontations and decisions, it is the only book that fully re-creates what happened and why. It also pinpoints the policies and decisions that got the United States into the morass and reveals who made these decisions and the motives behind them, disproving the published theories of other historians and excuses of the participants. Dereliction Of Duty covers the story in strong narrative fashion, focusing on a fascinating cast of characters: President Lyndon Johnson, Robert McNamara, General Maxwell Taylor, McGeorge Bundy and other top aides who deliberately deceived the Joint Chiefs of Staff, the U.S. Congress and the American public. Sure to generate controversy, Dereliction Of Duty is an explosive and authoritative new look at the controversy concerning the United States involvement in Vietnam.

Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. **International Handbook of Educational Policy**-Nina Bascia 2008-05-14 Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research, in over 25 chapters written by nearly ninety leading researchers from a number of countries. It is organized into 2 broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically, in terms of both how they are conceptualized and in terms of past policy practice. The chapters themselves are empirically grounded, providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them. The serenity within chapters with respect to jurisdictional particularities and contrasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places. The sections move from a focus on prevailing policy tendencies through increasingly critical and "outsider" perspectives on policy. They address, in turn, the contemporary strategic emphasis on large-scale reform; substantive emphases at several levels - on leadership and governance, improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding, finally, with a contrasting topic, workplace learning, which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy.

**Essentials of Accounting for Governmental and Not-for-Profit Organizations**-Paul Copley 2014-01-10 Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 12e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are

recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet.

**Pearl Harbor**-Homer N. Wallin 2001-09-01 Pearl Harbor will long stand out in mens minds as an example of the results of basic unpreparedness of a peace loving nation, of highly efficient treacherous surprise attack and of the resulting unification of America into a single tidal wave of purpose to victory. Therefore, all will be interested in this unique narrative by Admiral Wallin. The Navy has long needed a succinct account of the salvage operations at Pearl Harbor that miraculously resurrected what appeared to be a forever shattered fleet. Admiral Wallin agreed to undertake the job. He was exactly the right man for it in talent, in perception, and in experience. He had served intimately with Admiral Nimitz and with Admiral Halsey in the South Pacific, has commanded three different Navy Yards, and was a highly successful Chief of the Bureau of Ships. On 7 December 1941 the then Captain Wallin was serving at Pearl Harbor. He witnessed the events of that shattering and unifying "Day of Infamy." His mind began to race at high speeds at once on the problems and means of getting the broken fleet back into service for its giant task. Unless the United States regained control of the sea, even greater disaster loomed. Without victory at sea, tyranny soon would surely rule all Asia and Europe. In a matter of time it would surely rule the Americas. Captain Wallin salvaged most of the broken Pearl Harbor fleet that went on to figure prominently in the United States Navys victory. So the account he masterfully tells covers what he masterfully accomplished. The United States owes him an unpayable debt for this high service among many others in his long career.

**Sensation and Perception**-Jeremy M. Wolfe 2012 Sensation and Perception is written to introduce students to their own senses. Human sensory and perceptual experience is emphasized, and the neuroscientific underpinnings of that experience introduced. Chapters are written by experts in each of the sensory systems: by integrating current findings as the basics are presented, the authors impart to students that these are active areas of research. The text provides comprehensive treatment of higher perceptual functions (e.g., attention, music, language) as well as sensory systems beyond vision and audition (including, notably, a full chapter on Spatial Orientation and the Vestibular System as well as separate chapters on Taste and Olfaction). The new Third Edition reflects the growing contribution of imaging studies to the field, discusses applications of sensation and perception to clinical problems (e.g., visual search in radiology), and expands its treatment of modern theoretical approaches (e.g., Bayesian models).

**Financial Accounting for Executives and MBAs**-Paul J. Simko 2016-11-20

**Guadalcanal**-John Miller, Jr. 2015-07-11 In publishing the history of combat operations the Department of the Army has three objectives. The first is to provide the Army itself with an accurate and timely account of its varied activities in directing, organizing, and employing its forces for the conduct of war-an account which will be available to the service schools and to individual members of the Armed Services who wish to extend their professional reading. The second objective is to offer the thoughtful citizen material for a better understanding of the basic problems of war and the manner in which these problems were met, thus augmenting his understanding of national security. The third objective is to accord a well-earned recognition to the devoted work and grim sacrifices of those who served. "The successes of the South Pacific Force," wrote Admiral Halsey in 1944, "were not the achievements of separate services or individuals but the result of whole-hearted subordination of self-interest by all in order that one successful 'fighting team' could be created."\* The history of any South Pacific campaign must deal with this "fighting team," with all United States and Allied services. The victory on Guadalcanal can be understood only by an appreciation of the contribution of each service. No one service won the battle. The most decisive engagement of the campaign was the air and naval Battle of Guadalcanal in mid-November 1942, an engagement in which neither Army nor Marine Corps ground troops took any direct part. This volume attempts to show the contribution of all services to the first victory on the long road to Tokyo.
